

## Charmaine

Arkansas is the land of opportunity—a place where any hard working citizen can make a better life for themselves.

Education is one of the ways CADC helps Arkansans advance in life. CADC support single parents through scholarships, provides funding for college through low-income savings accounts, and helps pre-school children be the best they can be through health and family supports.

Charmaine knows education is the foundation of her future. The MBA student is also a temporary ARRA employee. The workplace experience has already transformed her outlook. Now she's being equipped with education and experience, increasing her chances for employability.

When Charmaine succeeds in her goals, we all succeed. Through job training, CADC is helping improve the future of Arkansas' workforce. CADC's commitment to building futures is changing lives for people out of work.

*Education plus  
experience will  
mean success for  
Charmain*
